Experience

Senior Full Stack Software Engineer EY *Portland, OR* **01/2022 - Present**

- Lead collaboration between cross-functional teams and direct engineering effort to unlock mission-critical capabilities for clients
- Debug and build scalable Go and Python backend systems to support custom React Typescript user-first front-ends
- Mentor junior engineers in best practices and clean code guiding them to be ready to take on more responsibilities
- Maintain and document Docker and Azure DevOps pipelines to increase engineer efficiency leading to higher quality products
- Architect efficient and reusable front-end systems for a robust and optimal user experience

Lead Full Stack Software Engineer RangerCode (Founder) *Portland, OR* **06/2022 - Present**

- Develop custom solutions for clients using Svelte, React, Redux, Typescript, TailwindCSS, GraphQL, and AWS
- Oversee CI/CD processes, design teams, and vital business operations to guarantee optimal customer experience
- Design and develop robust backend systems in Python and Go to efficiently handle data and create a smooth user experience
- Create documentation and tutorials for clients to facilitate smooth transition and easy scalability when other in-house teams

Full Stack Software Engineer BIGGBY Coffee *East Lansing, MI* **06/2020 - 12/2021**

- Built a scalable online ordering platform using React, Redux, Typescript, GraphQL, and AWS, generating \$12.0M in revenue
- Maintained codebase with Github actions and husky hooks to ensure high quality code standards
- Assisted in integrating new front end features into a Python/Django backend
- Led a team of 3 junior engineers and mentored them in best practices and professional development

Software & UX Engineer PAHA *East Lansing, MI* **01/2020 - 06/2021**

- Collaborated with senior management on design and UX decisions to optimize user experience
- Developed a static site using JavaScript, CSS, and HTML5, intended for hosting on third-party platforms
- Prioritized user-centric design to efficiently deliver desired information with minimal user effort

Skills

- **Frontend:** TypeScript, React, JavaScript, Svelte, Angular, Redux, Recoil, HTML5, Tailwind, Sass, Accessibility
- **Backend:** Go, gRPC, Python, REST, GraphQL, Apollo, Node, Express, SQL, AWS, Azure, Docker, MongoDB, PostgreSQL
- **Development & Testing:** Git, CI/CD, Jest, Cypress, Unit Testing, OOP, Functional Programming, Agile
- **Design & UX:** Figma, Information Architecture, Usability Testing, Wireframing, Digital Prototyping, Iterative Design
- **Soft Skills:** Leadership, Mentorship, Communication, Curiosity, Problem Solving, Project Management, Time Management

Education

Bachelor of Science Michigan State University *East Lansing, MI* **08/2015 - 05/2020**

- Major in Experience Architecture (Computer Science with UX Design)

Projects

- Drive Sync - A Google Drive sync tool written in Go to search Google Drive file trees recursively and download them locally if they do not already exist on disk
- Finance Tracking Microservices - A collection of microservices using Go, gRPC, and SQLite to create and manage financial records.
- Krypt - A cryptocurrency app using React, TypeScript, and Tailwind, allowing users to manage real crypto transfers
- EY Blog - A contemporary, responsive blog platform for EY studios worldwide, catering to a diverse audience of tens of thousands of readers across various devices
- Carter Treehouse - An Airbnb site made with a fully custom, from scratch, CMS system utilizing Google APIs
- Biggby Online Ordering - An intuitive online ordering app for a modern experience, enhancing user satisfaction
